

Astrology – Which Birth Stars Make a Hijra

Our zodiac has 12 solar mansions of which odd signs Aries♈, Gemini♊, Leo♌, Libra♎, Sagittarius♐ and Aquarius♑ are male signs and rest Taurus♉, Cancer♋, Virgo♍, Scorpio♏, Capricorn♑ and Pisces♓ are female ones. Sun **A**, Mars **t** and Jupiter **F** are male planets and Moon **B**, Venus **D**, Mercury **C** and Saturn **G** are females ones. Mercury **C**, common signs of which two ruled by Mercury **C** – Gemini **c** and Virgo♍ and rest two ruled by Jupiter **F** – Sagittarius♐ and Pisces♓, constellations ruled by Mercury **C** - Ashlesh, Jyeshtha and Rewati have hermaphroditic tendencies.

Thought there is no evidence but studies show that human race was hermaphrodite in its beginning evolution and male-female sexes were separated very late. Even today, sometimes our body expresses the primitive genetic behavior by giving birth to hermaphrodites i.e. a child with sex organs of both male and female. Moon **B** in ascendant in common signs with Saturn **G** and Mercury **C** ill aspect by Mars **t** may produce hermaphrodites. Gemini and Sagittarius produce she-males with male behavior and Virgo and Pisces produce she-males with female behavior.

Lack of proper internal and external sex organs may produce hijras. This may be caused when Libra **g** and Scorpio♏ signs or Venus **D** and Saturn **G** are afflicted in IV or VII house. Affliction may be in the form of both being retrograde, ill-position, ill aspect from Mars **t**, Rahu **n** –Ketu **u** and Neptune **I**. They affect proper development of male or female organs and as such body lacks organs of male/female hormones.

In such cases, affliction to Venus **D**, Moon **B**, Mercury **C** and Saturn **G** with Venus **D** / Moon **B** dominance, produce female hijras whereas above affliction with Mars **t** / Sun **A** dominance produce male hijras.

Not all hijras are subjected to castration, as some may not need to. Some are subjected to castration when their Mars **t** is heavily afflicted with Saturn **G** and/or Ketu **u**.
